

Zero Gravity

3D Zero Gravity | Massage Chair

AG-M5310

猶如置身星空的悠然

Just Feel Like Staying Leisurely at Starry Sky

Made in TAIWAN

Sensationally Engineered

The factor of defining a good massage chair lies in the core of it, the massage motions. Performing more is far easier than performing it right, performing it closer to perfection.

You deserved better rather than more from a massage chair; **3D Zero Gravity Massage Chair**, an all new massage chair available to you, engineered to deliver better massage in terms of accuracy and comfort.

It features -

Zero Gravity, 3D Massage Mechanism is to extend the massage arm forward so as to be closer like human massage as well as raise massage force and effective massage range.

Body Navi+™, a wonderful technology that maps your body shape prior to a massage program, to ensure accurate massage is delivered according to your spine contour. Also, it automatically adjusts intensity of massage to fit individual users, bringing equivalent joys of massage.

Live3D Massage™, massage arms made extendable, not only it feels closer to human massage, it enlarges intensity level and as well as coverage to your upper body.

As a result researched by NASA in US,
the posture at “Zero Gravity” is the ergonomic lying angle
with the minimum human pressure caused by gravity; simply speaking,
when the angle between human body and thigh is at $126^{\circ}+7^{\circ}$ elevation angle,
it is the most relaxed posture for all human body joints and muscles.

Over time, no matter what kind of posture,
joints and muscles will feel exhausted gradually.

In view of it, NASA developed a “Zero Gravity Theory”
according to ergonomic principles. The concept of Zero Gravity posture
is to distribute the body gravity into whole body as possible,
instead of being compressed locally. By doing so, the body will be at fully relaxed status.

NEW & Exclusive

Live3D Massage™

Your desire of human-like massage has finally come true on a massage chair.

The upper 2 rollers could extend up to 6 cm of extra dimension, in order to relieve stiffness on top of your shoulder and neck.

As for the lower 2 rollers, which are made in thumb shape, bringing the sensation to a greater level.

Body Navi+™

3D Zero Gravity Massage Chair is able to sense your body more accurate with its 3D motion massage rollers, the data then transferred and transformed as reference to deliver an all new level of great experience; robotic massage has never felt this close to human massage.

The sensational pleasure, and quality of robotic massage has fundamentally improved with Body Navi+™. the page of massage chair is re-written.

Massage Techniques
